**Mission** of Grameen Sahara is to promote Large Number of Sustainable livelihoods through:

- Provision of technical and financial assistance in an integrated manner.
- Mobilizing community for participatory action, institution building

**Vision** of Grameen Sahara is to improve the quality of lives of the Disadvantaged people. Here, Under the umbrella of Disadvantaged comes resource, underprivileged, destitute, those who are in need and lack of resource and capacity.

**Our Values**

- **Accountability**: Transparency and Accountability: Openness at individual and organizational level.
- **Professionalism**: Utilizing expertise to maximize effects.
- **Commitment**: Covering promises into action.
- **Impact**: Our works must be impactful; not just project implementation
- **People First**: Respect, care and ethical practice
- **Integrity & Trust**: Integrity in every action, adherence to organization’s rule, systems and processes.

Grameen Sahara, Dubjeni, Kulshi Road, Chhaygaon, Kamrup, Assam-781124
Production and process, Market linkages—both physical and digital, accounting & financial management at grass root institutional level & at apex level, Leadership, Skills and enterprises, POP training, etc are provided to the beneficiaries of various projects of Grameen Sahara.
Financial Support

Grant is given either in cash or in kinds/inputs. Not always possible to support all the beneficiaries.

Seed capital: As a start up support we also provide seed capital to meet the needs of a limited number of beneficiaries.

Bank linkages: The financial needs are met through bank linkage and not always through grant support.

Insurance coverage is done for the beneficiaries.

Community Mobilization

Organizing group into small groups and bring them into federation or development/social enterprises Equity & debt management

Advocacy

Lobbying and guiding community to reach appropriate/concerned authority to place their grievance and to get their dues/rights especially the entitlements.

Grameen Sahara works on this framework above to make the livelihoods supported sustainable. It also addresses the SDG goals set by UN.
OBJECTIVES OF GRAMEEN SAHARA

1. To improve the pace and quality of life of the poor especially the village and decentralized segment.

2. To focus attention on the women, children, scheduled castes, scheduled tribes, minorities and other backward communities for economic self-sustenance.

3. To create, develop and support self-employment avenues for the educated, unemployed rural and urban youth.

4. To use all the available natural, social, economic and other resources for the well-being of the community.

5. To build social capital that will be used by the community and for the community.
The impact of the global health crisis has not yet been over till Match 2022 which has been unprecedented although major restrictions have been withdrawn by the government. I am pleased to share Grameen Sahara could contribute to the impacted people both in terms of relief requirement and the post pandemic recovery effort for them. The year was very challenging in terms of achieving the targets in majority of the projects as we had to put many activities in halt.

We had to seek for extension of time. Meanwhile, CRISIL Foundation, MBDA, NEDFi and SIDBI approved new projects and we could continue our engagement in the field in Assam and Meghalaya. We as a team could adhere to the mission of Grameen Sahara as the Mission and Vision of the organization are very close to the hearts of the team which is founded with all possible sincerity and honesty to do something for the society. 20 years journey has not always been smooth. We have always explored all possibilities to strengthen the livelihoods of the poor people through different workable strategies. Grameen Sahara through its all-thematic verticals have continued to focus on sustainable livelihoods. Self-employment has been focused, whether farmers, artisans or small entrepreneurs. Several institutions/enterprises have been promoted to take care or carry forward our works after we exit. As a group of social enterprises, we have covered around 70,000 families that have impacted 3,50,000 lives. Grameen Sahara has plans to reach 1,00,000 families with 5,00,000 lives in next two years. Although we have passed through turbulence, we could remain resilient continuing services to the beneficiaries. The challenges are big. Economy is down, jobs are scares, market is complex, small businesses are in trouble and so on. Increase of price of consumer goods, that impact the farmers, have impacted the quality of lives of the people. For the organization, changing peoples’ perspective for honest engagement in productive works is a challenge. Now also entrepreneurship and agriculture has not been first choice for most of the rural households.

We know that we will have challenges moving ahead as the scenario is changing, focus of CSR funds is changing, mode of operation is not like before and so on. There are funding agencies who have reposed confidence on us and that must be appreciated. I am sure that funding agencies will continue to provide us funding in future also. We are confident that with the committed team and supporting/mentoring board Grameen Sahara will be able to continue create impact on the lives of the underprivileged families in the region. Values are something that we all thrive on. As a part of Grameen Sahara movement, the success and the true sense of making a difference lie in our belief that it takes only an honest thrive by a few groups of committed citizens to make a considerable number of differences. We dream of a society that would create opportunities for the generations to come.

I thankfull to our funders, technology partners, beneficiaries, staff members, and the regulators for cooperation, support, guidance and partnership. Finally, I am very grateful to the board members for their guidance, support and cooperation.
Message from the Executive Director

Message from Executive Director

Grameen Sahara has passed another eventful year progressing with its development motive. The year was challenging, given the two waves of Covid-19 in North East as like anywhere else in India. But despite of all the challenges in the development sector scenario we were able to keep ourselves in track on our journey of community development and delivered wellbeing interventions to the society as a whole along with sustainable impact. I consider it as an utmost privilege to present before you our progress and share our plans for the coming years.

The FY 2021-22 has given us opportunities for partnership and collaboration with new national and international agencies like Meghalaya Basin Development Agency (MBDA) and DASRA which helped strengthening our capabilities to serve the unreached and underserved.

I sincerely thank IndiGo Reach, Azim Premji Foundation, Assam Rural Infrastructure and Agricultural Services (ARIAS) Society, Assam State Rural Livelihood Mission (ASRLM), Agile Airport Services Pvt. Ltd., Small Industries Development Bank of India (SIDBI) other agencies who have supported our initiatives to aid the poor, needy and vulnerable sections in the society.

In closing let me thank our Governing Board for their exceptional support, guidance, and advice all along the way. Also, I would like to thank our well-wishers and the entire team for associating with Grameen Sahara and having trust in the organisations and its activities.

Operational strategies of Grameen Sahara

We as an organization, Grameen Sahara has a six-pronged intervention strategy which helps sustain its interventions after exit from a location/village. Given the size and its resource base Grameen Sahara does not continue its intervention in a location for long. Neither it aims to. The organization works in an area, build institutions or enterprises and exit the place handing over the support mechanism to the institute or enterprise. That is how the organizations brings sustainability to what it intends to with investment in terms of money, time, HR, strategy, etc. This has worked and Grameen Sahara will continue with this strategy for next few years. If there is any call by changing scenario, market, policy etc Grameen Sahara will adjust its operational strategy at the appropriate time. The strategies are elaborated below—

Six strategies of Grameen

1. Promotion of Community Based Enterprise
2. Developing Pool of Local Service Providers
3. Financial Linkage
4. Rebuilding social Capital
5. Promotion of Micro & Small Enterprises
6. Linkage and Partnership

Social network and public projects

Equality

Social trust, honesty and reliability

Trust

moral standards and human values

Fairness

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
1. Rebuilding Social Capital:

Grameen Sahara works on strengthening the networks of relationships among people who live and work in a particular society, enabling that society to function effectively. It leads to effective functioning of social groups through interpersonal relationships, a shared sense of identity, a shared understanding, shared norms, shared values, trusts, cooperation and reciprocity. It encompasses the value of resources - both tangible (e.g., public spaces, private property) and intangible (e.g., actors, human capital, people), and the impact that these relationships have on the resources involved in each relationship, and on larger groups. It is the most challenging task for Grameen Sahara.

By way of organizing, orienting, making awareness, enhancing capacities of the grass root institutions like SHGs, village organizations, FIGs, apex level institutions such as producers’ cooperatives, FPCs, etc. This very strategy is aimed at improving their access to technical assistance, financial services, and livelihood options and to provide them a platform for networking, marketing, lobbying and advocacy. These institutions carry a certain set of norms that promote trust and cooperation among person in communities and also in the wider society. This social capital foster trust, mutual obligation and cooperation. We as an organization always endeavor to create individuals feel a sense of belongingness, empathy with fellow villagers, responsibility and motivation to solve common problems and so on.

2. Developing Pool of Local Service Providers

For continuation of any initiative local capacity development is crucial. Grameen Sahara does that in such a way that all initiatives are slowly made owned by the community and transformed into like a community-led approach. To build a strong knowledge base within the community by building capacities and empowering the interested individual as Community Resource Person (CRP), Field Facilitators (FF), Extension Workers (FEW), Para Professionals (PP), etc. are what we do as an organization. This strategy is to equip them with the exposure, technical skills and the necessary expertise, so that these local resources are able to continue the services to sustainable agriculture long after our intervention stops. This is important for exit plan of Grameen Sahara. This has been done time and again and the organization has been able to withdraw from multiple locations.
3. Promotion of Community Based Enterprise

To give maximum benefits to the community, among many strategies, we promote community-based enterprises owned and managed by themselves. They use such platforms for the benefits of the community. They are different from private enterprise because their business activity is undertaken as a means of achieving community benefit, not private gain. To make them sustainable these enterprises are owned and controlled by the community. However, as a strategy they are run by professionals. They are mostly for-profit social enterprises. We facilitate these enterprises upscaling their businesses, reaches, generates more jobs and brings benefits to the community. These enterprises play important role in strengthening local economies. Grameen Sahara continues to mentor the enterprises promoted.

4. Promotion of Micro-Enterprises

For economy to grow micro-enterprises play a very crucial role. It plays important role in employment of youths. It is one of the strategies of Grameen Sahara that individual and group of individuals are mobilized, encouraged, capacitated, provided the linkage in terms of technical assistance, marketing and finance. Thereby, it facilitates promotion of micro and small enterprises. Direct promotion, support and linkages with resource agencies etc are done by Grameen Sahara. There individual entrepreneurs who have got themselves employed and also employed other people in their enterprises.

5. Linkage and Partnership

To take the community ahead it is not possible for an institution does it alone. Domain expertise is with different resource agencies, departments and institutes. We, as an organization, collaborate and link with multiple institutions/agencies to provide all required supports in different domains. Grameen Sahara works in partnership with various stakeholders like the government, nongovernment agencies, banks and financial institutions, national/international funding and donor agencies of similar interest, to scale up the development interventions. This partnership and linkages help better
resource mobilization, collaboration, success and better impact. By way of complementation of expertise and supply of required resources linkages play very important role in community development interventions.

6. Financial Linkage

In the livelihood framework financial capital is one of the essential components. Without financial capital the framework itself becomes incomplete. Grameen Sahara either provides credit directly or through bank Linkages. Similarly, micro insurance Services are also provided with an aim to provide security to the family in the event of unseen happening. We also organize Programs for financial literacy for better Management of financial resources by the Communities. In addition to the loans, insurance etc we also mobilize grant support to the deserving beneficiaries.

Type of beneficiaries

Grameen Sahara works with women, weavers, artisans, farmers, vendors and youths.

Grameen Sahara is a development support organization based in Assam working in the whole of NE India. It works with farmers, artisans, weavers & spinners, youths and vendors with the aim to strengthen their livelihoods and thereby the quality of lives. The state of Assam has over 20 lakhs of unemployed youths and that has been increasing post Covid-19 outbreak.
Both the central and state governments have taken up multiple initiatives to enhance the employment opportunities in the state. Similarly, in the other states also the respective state has taken steps to create employment avenues. Unfortunately, the outcomes are not encouraging. And this is obvious as the state cannot provide employment to all its aspirants. Majority of them must go for self-employment. Industrialization in the state is late and they are not in a position to absorb the entire work force. Similarly, artisans, although having production capability due to marketing problems they are in trouble. Farmers are the other set of target beneficiaries who are most deserving section. Similarly, the agri product vendors are also having issue in terms finance, selling sites, consistent supply of materials etc and they also need support in all these cases. Therefore, we work with all these sections of underprivileged people especially in the rural areas.

Grameen Sahara came into existence in the year 2002 as a not-for-profit society, registered under Societies Registration Act 1860 in the state of Assam. It was founded by a few likeminded persons who were inspired by conviction that individuals with knowledge, experiences and empathy for the marginalized and disadvantaged must work at the grass roots so as to help them enhancing their quality of lives. Grameen Sahara believes that through enhancing the livelihood capabilities of the disadvantaged families and giving them access to sustainable income opportunities only can mainstream them in terms of access to the better amenities required for improved quality of lives. To do that Grameen Sahara endeavours to break from their past by developing an alternative vision of their future and set achievable goals. They are tried to equip with the technical, organizational, negotiating, and networking skills that will facilitate the fulfilment of their goals. Grameen Sahara’s aim is to stimulate and support the women and men to dream of a better future and stimulate their sense of agency as they endeavor to enhance incomes, improve access to services.

Grameen Sahara implements programs and projects with objective to promote sustainable livelihood within rural and semi urban communities who are deprived and lack access of development services. It was realized that the rural and semi-urban areas are facing problems with their livelihood leveraging activities due to pressure of limited financial and physical resources, lack of technical infusion to commensurate with the aspiration. Hence, there has been shift of people’s interest in terms of income earning activities. It was deeply felt to provide these un-served sections of society with both
financial and technical support to enhance the income requirements of their households but without compromising the health and sustainability of the environment. And Grameen Sahara has initiated several initiatives for the same which are explained here in this report. The organization has been supported by various government agencies, private donor agencies, banks, corporations, corporate houses and multilateral organizations. The detail activities and interventions have been explained later in the report.

We as an organization understand the challenges to smoothen and roll the wheel of development. We have our strategies to make the efforts work and we move on. Our interventions have impacted over 3,50,000 lives.
Harnessing Latent Potential of rural poor is important in all development interventions of any organization engaged in development of a community. We organize the poor households (women) into aggregate institutions of the poor that provide them with the strength, voice and resources to take care of their needs. These institutions are facilitated partnering with government, public service providers, banks, private sector and other mainstream institutions to facilitate delivery of social and economic services to them. While sustainability of our intervention is important identification of the deserving families are done through a participatory process. Actually, they are made part of a self-help participatory process and institutions. The beneficiaries are mobilized and organized into SHG, FIG, FPGs etc at the grass root level whereas they are federated at the village and higher levels (cluster/bloc/sub-division/district etc). This area of intervention actually is to strengthen and integrate them into the institutional architecture of the poor. They are then federated at the village and higher levels (cluster, block/sub-division/district etc). The families/members are trained to manage their institutions, linking up with markets, managing their existing livelihoods, enhancing their credit absorption capacity and credit worthiness, etc. A multi-
pronged approach is adopted for providing continuous capacity building of the targeted families, SHGs, their federations, companies, cooperatives, FPCs etc.

**Natural Resource Management (NRM), Agriculture Development & Clean Energy**

Under this thematic area Grameen Sahara works on water resource management, promotion of organic farming, livestock management, fish rearing, sericulture, hand-loom and handicraft promotion, etc. NRM basically refers to the sustainable utilization of major natural resources, such as land, water, air, minerals, forests, fisheries, and wild flora and fauna. Together, these resources provide the ecosystem services that provide better quality to human life. Grameen Sahara as an organization has been acting responsibly that rejuvenate the nature, improve the soil-health, manage water very judiciously, does plant in a very big way so as to contribute to the nature by way of producing oxygen and absorbing carbon dioxide. While promoting and supporting livelihoods of people our intervention plan is always climate friendly. Clean energy has become very important from the sustainability point of view. It has no negative impact on the climate and earth. We have been working with clean energy projects. Water lifting devices, home lighting, electronic device charging, small motor running etc are being promoted vide solar energy. We have collaborated with SELCO Foundation.

**Financial Inclusion and Services**

Financial inclusion may be defined as the process of ensuring access to financial services and timely and adequate credit where needed by vulnerable groups such as weaker sections and low-income groups at an affordable cost. Grameen Sahara has, right from its beginning, been working on financial literacy and inclusion. We provide financial literacy training as well as bank linkage to the beneficiaries. In the process Grameen Sahara has reached a total 40,000 families through financial services directly and indirectly. This achievement has been mostly by its group organization Grameen Development & Finance Pvt Ltd. Grameen Sahara links the families in need of financial needs with the formal banking system or with microfinance institutions.
Skill & enterprise Development

Skill enhancement of youths has been one of the focused areas of the government of India as well as the state government. State government has taken up the skill development in a mission mode. Grameen Sahara has implemented several projects on skill building and enterprise promotion supported by NABARD, SIDBI and Meghalaya State Skill Development Society funded by ADB. We have promoted more than 2,000 micro-enterprises in Assam and Meghalaya. Enterprise promotion is very crucial for the economy as a whole as it contributes employment, production and services to the economy and thereby help growing the economy, its GDP. It is one of the thematic areas of Grameen Sahara that individual and group of individuals are mobilized, encouraged, capacitated, provided the linkage in terms of technical assistance, marketing and finance. Thereby, it facilitates promotion of micro and small enterprises. Direct promotion, support and linkages with resource agencies etc are done by Grameen Sahara. There individual entrepreneurs who have got themselves employed and also employed other people in their enterprises. We also promote community enterprises where aggregation of produces, processing and marketing becomes important, where individual enterprises are found to be challenging for sustainability.

Education:

Assam is a state in northeastern India. In 2011, the literacy rate of Assam was estimated to be 73.18% (78.81% male and 67.27% female). This is slightly below the national average. Education is the backbone of any nation in terms of overall human development. Grameen Sahara understands its importance and has continued working in the education sector. It started with a project by name Teach My Village (TMV) at six villages in Chhaygaon Development Block in Kamrup district. It was implemented for six years and established a culture among the students. Grameen Sahara has in the year 2014 started a low-cost school under CBSE curriculum. Currently 300 students are there in the school up to class-VII. A dedicated team of teachers guide and facilitate the study of the students in a very committed manner for their all-round development.

While working with community we cannot separate these areas distinctly. Rather all thematic areas are interconnected. Our interventions create impact on the lives of the target families providing various services.

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
majority of cases, we strategically move our activities towards building sustainable institutions with revenue model so that the members get the post project support from the new institute. We have been able to achieve many milestones where thousands of beneficiaries have been organized around institutions registered under different legal forms. The institutions promoted in this way continue to provide necessary supports to the families associated with them, who happened to be beneficiaries of Grameen Sahara during project implementation phase.

Milestones

Focus on enterprise promotion, climate, skill, education, ODFPL, OSPCL, CoE, CML, etc came into existence and spun off started from OS. Institutions began its sustainable journey.

2022

All thematic areas of interventions started. Institution building and community enterprise building got focus and already institution building happened.

2017

Second phase started with mainly three thematic areas. Institution Building, NRM & AD, Financial inclusion and could mobilize financial resources to take projects.

2012

Grameen Sahara came into existence with an aim to support and promote sustainable livelihoods for underprivileged families in NE India. It started from Goalpara district of Assam and with training and capacity development of tribal families at Majuli Development Block.

2007

2002

Milestones of Grameen Sahara
Institutions built

1) Grameen Silk Producer Company Ltd (GSPCL)

This is the first organized institute promoted by Grameen Sahara under its multi-thematic areas - institution building, skill & enterprise promotion, and financial inclusion. This institution came into existence as a producer owned company with shareholding of 997 spinners and weavers. From a few spinners mobilized and organized under Golden Weaver Project, it covered over 5,000 spinners and with 1,000 shareholders it was registered as a company. It was registered in the year 2012 and it has been successfully running on its own. The company sells the produce of its shareholders/producers within and outside the state. It has also got a retail show room at Chhaygaon city in Kamrup district of Assam.

2) Grameen Development & Finance Pvt Ltd (GDFPL)

Financial inclusion/service is one of the major vertical of Grameen Sahara. It was running its microfinance program since 2007 and continued to reach 10,000 families with a portfolio of 15 Cr. Later in 2012 as its portfolio was growing Grameen Sahara decided not to continue with its microfinance program and decided to transform the portfolio into a regulated entity. The company, erstwhile known as Sharnarathi Leasing and Finance Pvt Ltd, was changed to Grameen Development and Finance Pvt Ltd with shareholding of individuals, Mutual Benefit Trust, NEDFi, SIDBI etc. The company has now operation in 4 states (Assam, Meghalaya, Nagaland and Mizoram) in the region covering 18 districts. The current portfolio of 50 Cr the company has client base of 30,000 families. The company was doing very well till the Covid-19 emerged and the government of Assam announced the loan waiver to microfinance borrowers. The company is slowly recovering and hopefully by end of this financial year the company will be back to its original or into its normal operational level.

3) Centre for Microfinance & Livelihood (CML)

CML was conceptualized not solely by Grameen Sahara, rather it was done by a group of organizations led jointly by Grameen Sahara and Tata Trusts. It was basically to support and fund small organizations working on livelihoods and...
community-based microfinance. It was started in the year 2008. During the course of its operation the Centre worked with 98 NGOs from across the NE India. Later the project was registered as a society as a separate entity in 2012. In the year 2015 CML was taken over by Tata Trusts as its associate organization of the Trust. In addition to capacity building of the smaller NGOs, CML also used to fund them for taking up innovative projects by them in different parts of the region. Later its focus from capacity building of NGOs shifted to other areas such as direct project implementation by the organization itself from funds provided by the Trust and also mobilizing funds from other donors.

4) Pakhalika Producers’ Federation

PPF was a transformed producer entity post implementation of a project supported by ICCo, Netherlands. It was basically to enhance capacity of the eri-silk spinners at Boko Development Block, increase the productivity, link them with the market, and finally organize them around a producers’ institute. There are 374 spinners who were organized into producer groups and finally registered them as a Mutual benefit Trust. The motive behind formation of this producers’ institution is to empower these poor spinners with power of collective bargaining. This will help them to sell their produces i.e., Yarn directly into the market without the interference of the middleman. Later this trust got merged with Pratishruti Pure Agro Private Ltd.

5) Tung-Char Producers’ Federation

This institution also came into existence with the financial support of ICCo. A project was implemented in Goalpara district of Assam in two blocks - Kushdhowa development block and Balijana development block. 500 weavers - both tribal and non-tribal - were organized into a producer organization. We also acknowledge support of Asom Mahila Samata Society (AMSS) in the implementation of the project and for hand-holding of the weavers during the course of the project. This society has also been supported by NABARD. Post implementation of the project we exited from the location and the entity has continued on its own.

6) Grameen Pig Producers’ Federation

Grameen Pig Producer Federation is not a registered body, it has remained as an informal association of 125 women producers from Chhaygaon Development Block.
and all the members are tribal women pig producers. While implementing a project funded by ICCo we organized them into a producers' federation and a piglet production farm was set up. The farm was handed over to the federation. Our support continued as we could link the federation with a government Mission - Assam State Livelihood Rural Livelihood Mission (Mission). The federation is being now groomed by ASRLM. It was supposed to be registered as a producer company, but because of initial reluctance of the producers it remained as an unregistered body. In near future with due guidance from our side and ASRLM the federation is going to get registered. Although primary objective was to produce quality piglets, later it started working as a pig rearing farm.

7) Siro-Seuji Krishi Samabay Sammittee

This farmers cooperative was promoted with financial support from NABARD. We started working in Goalpara district on promotion of SRI with financial support received from Tata Trusts. We worked with 7500 farmers. NABARD supported on promotion of FPO in the district and also a bank-JLG linkage program. Siro-Seuji Krishi Samabay Samiti was promoted with women farmers as its shareholders. The society is based in Kushidhowa development block. It has been registered as a cooperative society. The coop has a retail outlet for sale of its various products, especially the handloom products.

8) CoE on agri & allied enterprise promotion

It was joint initiative of Grameen Sahara and ICCo, Netherlands. The basic aim of this center was to support the start-up agri and allied entrepreneurs from the whole NE region. The start ups and also the existing entrepreneurs were provided work station with all required infrastructure facilities. Experts were engaged for their capacity building in terms of management of finance, Business planning, mobilization of funds, HR management, marketing, etc. But the centre could not be run for long because of multiple challenges that got emerged during the course of its implementation. Later Grameen Sahara exited and ICCo continued the service through the centre. The Centre of Excellence aspires to set world class standards of training, incubation and business booster services in agro-allied sector with a geographical focus on East and North East India. Given, the limited development of this kind of services or even concepts in agro-allied space and with a particular focus in North East, the risks are inherently high and so is the potential of transformation. A proper and continuous risk identification, assessment and
mitigation frameworks, is imperative throughout the design and execution of COE activities.

9) Grameen Jyoti Academy

There was a public demand for doing something in the education sector. Grameen Sahara has its strategic vertical of education. It also implemented an education project by name Teach My Village. Students from class-I to class-X were covered from six villages through appointed volunteers who were engaged in guiding, tutoring, and counselling, and facilitating their studies. The students were visited in the morning and evening and necessary guidance was given to them. In the year 2014 based of needs Grameen Sahara set up Grameen Jyoti Academy - under CBSE curriculum. Students have reached class-VII and as on date there are 300 students. We charge a very modest tuition fee from the students. They come from different villages. All required facilities have been created - such as Library, Laboratory, Play Ground, Recreation Centre etc. The school is doing well with qualified and committed teachers. Going ahead the School will be upgraded into a Senior Secondary School within next three years.

10) Promotion of Mutual Benefit Trusts (MBT)

Considering the minimum number of compliances Grameen Sahara promoted Mutual Benefit Trusts with membership of the farmers, spinners and weavers. The one narrated above - PPF is also an MBT registered with membership of weavers and spinners. In addition, we have also promoted two MBTs namely Organic Bhumi (OB) and Seuj Bhumi (SB) with membership of farmers mostly spice farmers.

i. Organic Bhumi

This trust was registered on 7th December 2016 as a for profit trust comprising of the spice producers. This institution is taking care of the aggregation, and marketing of spices mainly turmeric and black pepper. The farmers were later brought under the IndiGo project and continued our support in terms of providing POP, institution building, marketing, post-harvest technology transfer etc. Earlier paddy was the main crop for these farmers, later many farmers started taking up spice cultivation as a major crop. This MBT covers farmers from Chhaygaon, and Bangaon development block.
Seuj Bhumi is similar to OB comprising of farmers from two other blocks - Jharobori Development Block and Rani Development Block. This trust covers more than 500 members as its shareholders. They all have spice as standing crops all the time either in the homestead or in other plots. The trust helps the farmers linking them into the market for selling their produces.

One more trust is coming up soon in Boko Development Block. The structure will be the same.

These two MBTs have been promoted, which is going to be joined by another Trust, with an aim to organize them into a more regulated entity with their shareholding.

11) Pratishruti Pure Agro Private Ltd (PPAPL)

PPAPL is a private company with its registered office at Chhaygaon, Kamrup, Assam with the indirect share-holding of 1200 farmers through OB and SB as promoters. The realization of the difficulty of value addition in the farmers produces - turmeric, black pepper etc - in the part of the MBTs Grameen Sahara engaged itself intensely with the community on making them literate about the value addition, challenges in marketing, branding, etc and to get them realized that they would need an apex and higher-level institutions to be run very professionally. Farmers show the potential of a private company which shall have the capacity to mobilize resources and creating network. Accordingly, Pratishruti Pure Agro Pvt Ltd came into existence. The company has 1200 share holder as on date and it is going to increase to 1500 soon with shareholding of another MBT to be promoted in Boko Development Block.

12) Grass root institutions

All these are apex level institutions promoted by Grameen Sahara directly or facilitated the process of promotion. Over 2000 SHG/FPG/FIG/WUG/ESUG have been formed under various projects. Most of them in turn have been organized around various community owned institutions in various districts. The groups are under the projects such as IndiGo, APPI, APART, CRISIL project, etc. Most of them are in agriculture and allied activities. Around 15-20% groups are in non-farm activities.

**Districts where Grameen Sahara is working currently**

**Districts in Assam:**

1. Kamrup
2. Kamrup (M)
3. Goalpara
4. Dhubri
5. Kokrajhar
6. Morigaon
7. Nagoan

**Districts in Meghalaya:**

1. Ribhoi
2. East Khashi Hills

Grameen Sahara has worked in more than 1200 villages since its inception and with more than 75,000 families covering 3,75,000 lives. Many projects such as SRI, DBI, GWP etc were completed and later the beneficiaries were organized into producer entity. Household income as per reviews done by funding agencies range from 20,000 to 75,000 pa. Currently Grameen Sahara has been working in two states and in nine districts - seven districts in Assam and two districts in Meghalaya. Earlier we also worked in 13 more districts in the said states. In Meghalaya we worked in all 11 districts and in Assam we worked in two more districts in addition to the current districts.

Earlier we worked in all 11 districts of Meghalaya through its MSSDS skill development human capital development project. Similarly, we worked in Dhemaji (MKSP - through Mahila Kishan Sashaktikaran Pariyojna), in Tinsukia and Dibrugarh through Clean cooking stove project for the tea garden workers.

In addition, the group institutions like GDF have its presence in four states - Assam, Meghalaya, Nagaland and Mizoram - covering 18 districts serving 25,000 families. If we take up cumulative figures, the number of families covered will exceed

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
Major Projects and programs implemented:

Golden Weavers' Project (GWP)

GWP was the first major project of Grameen Sahara which was supported by Tata Trust way back in 2008. It was basically an eri-silk based livelihood project for the underprivileged women that addressed the skill need and enhancement, institution building, helping them with techno-managerial inputs, financial intermediation and market intervention. The project coverage was 5000 spinners and weavers. This project later got support from Central Silk Board, Silk Mark Organization of India, NABARD, NEDFi, SIDBI, Eco Tasar Silk etc. The project got matured and it was transformed into a producer company in the year 2012. There are 997 shareholders in the company. There was extended support to the project to support the FPC till November, 2016. Grameen Sahara withdrew on completion of the project and the company has continued to provide necessary supports to the spinners and weavers.

SRI Project

The System of Rice Intensification (SRI) involves cultivating rice with as much organic manure as possible, starting with young seedlings planted singly at wider spacing in a square pattern; and with intermittent irrigation that keeps the soil moist but not inundated, and frequent inter cultivation with weeder that actively. This practice was developed through an unconventional agricultural practice in Madagascar in 1920 which was adopted by different countries across the globe. In fact, it is a whole package of agronomic approaches which together exploit the genetic potential of rice plants; create a better growing environment (both above and below ground); enhance soil health; and reduce inputs. We implemented this project from 2008, initially partnering with RGVN (Rashtriya Gramin Vikas Nidhi) and later independently with financial support of Tata Trust. This project covered 13,500 farmers in two districts - Kamrup and Goalpara. Later of course more farmers were brought under SRI practices through MKSP project of NRLM. NABARD also provided support for the same project in other villages. This project did not have any intention to promote a producer entity like many other projects. These farmers confined themselves in farmer producer groups only.

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
Diversion Based Irrigation (DBI)

This is one of the major early projects of Grameen Sahara implemented since 2008. DBI is a simple and economical method that uses slopes and gravity to guide the flow of water from river/streams/springs to adjacent cropping areas. It is especially beneficial for hilly or mountainous terrains. The programme targets marginalized communities living in remote areas near the origin of streams. The first project was implemented in Kamrup district which was a canal base DBI. A total of four km of trench was dug from the Kulsi river and diverted water through the canal for agriculture. It covered eight villages and helped over 1000 farmers who were primarily into paddy cultivation. The canal once dug was maintained by Water User Groups (WUG) formed for that purpose.

The second phase of the project was not on canal irrigation. It was pipe-based irrigation from Hill Spring. This phase of the project was kicked off at four different locations in Kamrup and Goalpara District in the year 2009-2010 with the support of Jamshedji Tata Trust, Mumbai. Apart from the judicious utilization of water, farmers are facilitated with a range of services like improved production practices for seasonal vegetables, financial linkage etc. It was followed by third phase. Then finally we received supports from Azim Premji Foundation, Bangalore. In 50 villages we have created 50 infrastructures in Kamrup and Goalpara district of Assam. DBI has been a completely green project. It has helped the tribal villagers in homestead agriculture, met the water requirement for animals, drudgery for women was reduced, plantation with the assured water helped the ecosystem. We are setting up few more DBI infrastructures with financial supports received from Azim Premji Foundation.

Spice promotion for livelihood support

Assam Meghalaya boarder area is a suitable horticulture belt. Spice production potential of this area is high. Keeping this in view Grameen Sahara planned to intervene in spice, thereby supporting the tribal farmers increasing their income and livelihood condition. Amalgamated Plantation Pvt Limited’s (APPL) Foundation - APPL Foundation reciprocated with our idea and came forward with financial support. Turmeric and black pepper were identified as the principal crops. Starting from training on Package of Practices (POP), entrepreneurship, etc we set up cluster level black pepper.

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
nurseries so the planting materials could be made locally available. We worked with over 5000 farmers in Kamrup district. After the first phase was over, we could consolidate started working with 1500 farmers in Kamrup district with financial support of IndiGo CSR.

IndiGo has continued supporting for three years now and we could move to the value addition of the produces. We could set up five central cluster level nurseries in the villages. These nurseries are run by nursery entrepreneurs who supply their productions to the farmers at a subsidized rate or rather lower rate. The project also supported water lifting devices and vermi-bed for vermi compost production. Since the project has come towards its end, we have requested IndiGo to consider extension so that we can complete the value chain since we have already set up a processing unit.

Later, considering the potential and scope of the product, area available, interest of the farmers, we approached Azim Premji Foundation (Azim Premji Philanthropic Initiative) for funding support to extend the activity to Goalpara district. We received support from APF to support 5000 farmers in Kamrup and Goalpara district primarily with training support. Production has increased although we do not have the correct figures. And as planned and as required Grameen Sahara could mobilize a SFURTI project from MSME Ministry Micro, Small and Medium. GS received funding support to set up a processing unit in Kamrup district. With a processing capacity of 500 MT this is a small processing unit but it corresponds to the production volume in the entire area. This is also to be mentioned that the farmers are being brought under the farmers' producer company - Pratishruti Pure Agro Pvt Ltd (PPAPL). The company has been promoted by two FPOs - Organic Bhumi and Seuj Bhumi which are Mutual Benefit Trusts with membership of spice producers.

**Mahila Kishan Sasaktikaran Pariyojna**

National Rural Livelihood Mission under the Ministry of Rural Development implemented this project through State Rural Livelihood Mission. Northeast Development Consortium (NDC) was formed to implement the MKSP project in Assam with 5 organizations coming together. The project was implemented in seven districts with 14,000 women farmers. Women empowerment through agriculture income enhancement was the main objective of this project. Grameen Sahara worked in three blocks in two districts - Kamrup and Dhemaji. The overall
target was to form 1166 SHGs in the areas sated above. The state share was contributed by Tata Trusts i.e., 10% of the total budget. Remaining amount, i.e., 90% was supported by NRLM. The consortium had a secretariat at Centre for Microfinance and Livelihoods (CML). CML was primarily the coordinating and monitoring partner of the whole project.

**Rights of Woman in Conflict and Fragile State (RWCF) Project**

Grameen Sahara with a view to promote sustainable livelihood as well as to create an environment of peace and harmony in the areas where communal clash took place in the past has implemented a project with the support of Innovative Change Collaborative (ICCo). The ongoing ICCo project in the district of Goalpara and Kamrup in the form of consortium of three organizations (Grameen Sahara, Assam Mahila Samata Society and Reach India) has successfully completed the first year of the project duration. The project has been running smoothly in coordination with the partner organization. While sharing the implementation part of the program, we have seen positive changes in the project.

The major objective of the project is to enable women from diverse communities of Assam for their Right through Empowerment and Enhancement of their socio-economic status, with a view to Organizing them into peoples' institution, by providing technical assistance, increase in productivity and market support. 300 weavers from Kamrup and 500 weavers from Goalpara district were covered under this project. 300 producers were organized under an FPC by name Pakshalika Producer Federation, and the remaining 500 weavers were organized under Tungsar. Producers Federation. With their membership 8 peace groups also were formed as because there were some social issues between the communities. The project came into successful conclusion.

**Peoples' Institution for Livelihood Security project**

This project was supported by ICCo, Netherlands. Strengthening livelihoods of tribal families by way of capacitating them with scientific rearing of pigs, feed management, disease management, quality piglet production and supply and creating the technical veterinary service chain. There are 125 women pig rearers grouped together to work for the said objectives. The project

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
beneficiaries later promoted a cooperative federation. The institution then was linked to Assam State Rural Livelihood Mission to make hand-holding and other supports available.

The project supported setting up a piglet production facility centre at Rihabari village under Chhaygaon development block. A total of 100 pigs can be raised for breeding in the said centre. Initially, when it was handed over to the community institute, there were issues in terms of sharing labour, taking care of the pigs, feeding, diseases etc. But slowly, the community made arrangement of leasing out the farm to individual entrepreneur who continuing the activity and the members of the institute have been getting piglets as well as some revenues.

**Micro Enterprise Promotion Programme (MEPP)**

Grameen Sahara is a local area economic change agent dedicatedly been working for last 20 years. Micro enterprise promotion program has been very important for those who have got immense interest in self-employment. One of our important working verticals is enterprise promotion-both community and individual. Here in this project, we have supported and promoted individual entrepreneurs. SIDBI funded the first Micro-enterprise program to promote and support 250 entrepreneurs. We could achieve the target within the committed time in Kamrup and Goalpara district. We also received funding support from Tata Trust for promotion of micro-enterprises in rural and semi-urban areas. Little more than 50% of them could qualify and receive bank finance to take their enterprises ahead.

**FPO Promotion-Spice/ SFP- Small Farm Promotion**

Grameen Sahara has been working from long since with NABARD under different schemes. One of them is FPO promotion and the other is small farm promotion program. We worked in 6 villages under Rangjuli Development Block in Goalpara district of Assam. Members of the FPO promoted under this project are into promotion of spices. Later there were addition of weaving and diary production. Both the projects were supported by NABARD. Grameen Sahara also linked 20 groups to Assam Gramin Vikas Bank for bank credit. Siro- Seuji Krishi Samabay Samiti came into existence as a community/farmer owned entity that helped Grameen Sahara exits from the project.
Value Addition of Selected Rice Varieties of Assam using Clean Energy

Value addition of rice of Assam with clean energy is what this project did. The project was undertaken with a view to promote Gaba Amino Acid enriched Brown Rice as a part of value addition. Infrastructure has already been established in Tamulikuchi bordering Assam and Meghalaya. Three FPOs from Dhemaji, Kamrup and Goalpara district has been linked to this project for raw material procurement. 50% of the Plant machinery will run on solar energy and rest on grid. FSSAI license has already been obtained. Now the project is arranging for branding and marketing of the finished product. This project was funded by SELCO Foundation. We do not hesitate to say that the project could not be made successful in that it could not be sustained. Initial success was very exciting but because of some issues that emerged later the production could not be continued.

IndiGo Reach Spice Promotion Project

Under Spice value chain promotion, it has already been explained in brief. Here little more elaboration will be done. With 1500 women spice producers the project has made significant progress in terms of formation of cohesive and dynamic producer collectives, enhanced knowledge of spice cultivation, post-harvest management practices, marketing etc. A total of 24 villages have been covered in the project, divided into four clusters. The project envisioned to enhance the income up to 1,50,000/ pa.

The reviews and studies both in house and by third party has shown that the income enhancement has been up to 75,000 per annum over their baseline income. This is really significant. The project also has been able to get awarded at the national level. At regional level also it has been awarded.

All but few farmers are yet to join the company that has been promoted with the shareholding of the farmers. The project has completed three years in two phases. Now the project is trying to leap to the next level of value addition.

The recently set up processing unit will add value to the produces by way of processing - grading, cleaning, boiling, grinding, powdering and packaging. We are expecting
IndiGo to continue this noble effort of the organization that has helped the producers getting higher income.

**Details of the project:**

The intervention focuses on empowering 1,500 women farmers from 24 villages located in the Assam Meghalaya border areas in Kamrup and Kamrup (M) districts of Assam and Ri-Bhoi district of Meghalaya. The project sought to build on the existing work in the areas where Grameen Sahara has already its presence - past or present, leverage the strength of 20 years of experiences in promoting rural livelihoods particularly women and their collectives, building on local knowledge, adapting & introducing efficacious local technologies and create remunerative linkages with markets. It involves comprehensive engagement, support and instituting community based processes across the farm livelihood chain; (i) inputs (improved land and water resources, access to agricultural inputs including generating crop nutrition locally/ enhancing soil fertility, seed security) (ii) on-farm (enhancing productivity, diversifying into cash crops, reducing cost of production); (iii) output linkages (community entrepreneurs, economies of scale giving marketable lot-size production, aggregation and market-interface, access to terminal markets); (iv) community-owned knowledge resources (Farmer horticultural, flower and vegetables, Women Farmer-thought Leader) and (v) focus on building institutions of the poor at the village and cluster level.

The project is being carried out in 6 clusters based in the above-mentioned districts. The project level interventions demonstrated the possibility of increased income opportunities based on local level resources and efforts. Further, common investments have built capacities for enhanced productivity in spices value chain and reducing the burden on women through adoption of improved package of practices. The women Community Resource Persons (CRPs) and the Farmers Producer Groups and other institutions formed under this intervention among them whose capabilities and capacities have been intensively focused are the drivers of sustainability.

**The outcomes of the intervention:**

- 1500 women farmers in the clusters have been continuously producing Spices (Black Peppers, Turmeric, Ginger and King Chili) on a sustainable basis and along with a few high value vegetables with better comparable yield and reduced drudgery.
- The Institutions- Organic Bhumi and Seuj Bhumi formed under this intervention, are working as a common platform of the farmers.
- Another entity- Pratishruti Pure Agro Private Limited, formed with the share-holding of Organic Bhumi and Seuj Bhumi are well connected to markets and they

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
can buy competitively priced inputs for high production as well as strong output market linkages to ensure good price realization.

- Sufficient volumes are being produced by the farmers and their producer groups creating a vibrant agro-economic ecosystem which attracts a complete set of stakeholders from across the agricultural supply chain.
- Community Resource Persons and the leaders of the Farmers Producer Groups, and the other institutions are able to support larger number of farmers and are able to link up effectively to other programs.
- Suitable agricultural prototypes are developed for replication by other agencies and programs.

For the first time Grameen Sahara got an opportunity to work with IndiGo Reach implementing this project with its funding support. Grameen Sahara proposed to a sustainable livelihood option for 1,500 women and their families in 24 nos. of villages located along the Assam-Meghalaya bordering areas in Kamrup, Kamrup (M) and Ri-Bhoi districts. The focus of the project was to promote spices-Turmeric, Ginger, Black Pepper and King Chili and to establish a strong Farmers' Institution for entire marketing linkages. The beneficiaries were identified and selected through conducting a series of baseline survey. Awareness generation programs, Capacity building Training programs, exposure visits were conducted for the beneficiaries including the Community Resource Persons and Nursery Entrepreneurs. Five numbers of modern nurseries were also set up by Five entrepreneurs in all the Five clusters to make the availability of quality planting materials as per project norms. To create a sustainability of the activities promoted under this project we targeted to strengthen the community institutions formed with representation of the farmers. 151 numbers FPGs have been formed and 1046 numbers farmers have been linked with Organic Bhumi and 624 numbers of farmers have been linked with Seuj Bhumi. Like Organic Bhumi, Seuj Bhumi is also one of the share-holders of Pratishruti Pure Agro Pvt. Ltd. and this private limited company is taking care of the entire marketing parts of both the FPOs. This project has successfully leverage support from Government agencies such as HRS, KVK, Department of Agriculture and Spices Board of India. As mentioned above Grameen Sahara sought under this project to work in the tribal dominant areas where it tried its best to promote livelihood opportunities, building on local knowledge, adapting and introducing efficacies of local technologies and creating remunerative linkages with markets. It involved comprehensive engagement, support and instituting community-based processes across the farm livelihood chain.

**IMPACT OF THE PROJECT**

Process of project implementation with the total participation of the community encouraged the farmers to adopt improved agricultural practices by expanding their cultivable lands mainly for spices and few other crops in an integrated mode.

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
Before the intervention the farmers cultivated these crops in a negligible scale. But now these farmers are self-motivated to adopt improved agricultural practices. Earlier they could use at best 20% of their cultivable lands, and now this intervention has made the farmers to expand their cultivable lands up to 90% for cultivation of spices as well as a few other remunerative crops in all the cropping seasons. Besides household consumption they have become success to produce surpluses for selling and by selling those surpluses through their own FPO they could enhance the household income. In a sentence- we can say that this intervention has compelled to increase the involvement of the farmers to adopt advanced method of cultivation not only for household consumption but for enhancement of household income and thereby to improve the socio-economic status of these small and marginal farm families.

**Impact on women Empowerment:**

Women are the primary participants of the project. One woman from every targeted household was selected as a beneficiary of the project and participated in all the project activities as per norms of the project. These women became FPG member at village level then they form the FPOs at the apex level with their representation. Under the project all the women were trained on agricultural activities as well as on the management protocols of their institutions- at FPG level and FPO level. Their contribution towards the enhancement of their household income was very satisfactory which could improve their status not only in their family but also in their locality. Thus they could take part in the decision making process of their family, in their society and even in their own institutions- FPG and FPO by improving their knowledge on different subjects and issues.
Promotion of Spices among the Small and Marginal Tribal Communities through Area extension, institution building and Creation of Market Linkages - Supported by Azim Premji Foundation:

The Agro Climatic Zone where Grameen has been rigorously working to improve the livelihood of the community through the promotion of a few selected highly remunerative crops is known as the hub of spices- Black Pepper, Turmeric, Ginger and King Chili.

Spice production is one of the emerging opportunities which have commercial value both in Indian as well as the export market. The project areas are mostly located in the foot hills of Assam-Meghalaya border. The villages have multiple challenges in terms of education of children, accessibility of information, lack of awareness, access to market; low agriculture productivity due to traditional practice, aggregation and marketing, and lack of proper support mechanism to address these challenges. They practice traditional agriculture and due to lack of proper transport produces are always either sold at low price or many times produces get wasted. Due low price realization farmers get discouraged. The other reason is they normally grow traditional food crops and not high value crops or cash crops. Input support is not there, so they remain where they are which results limited income, mostly at their sustenance level. Similarly, there have been efforts to organize farmers, build their capacities and equip them with technical know-how. But concept and understanding of commercialization is less and not many such community institution has come up that could work with commercial principles. Building multiple such institutes is the need of

The project with its prime objective to enlarge the volume of production of the spices- Black Pepper, Turmeric, Ginger and King Chili through the expansion of area of cultivation and it has been designed to increase the skills and awareness among the women farmers strengthening their institutions so that the initiatives sustain in the long run.

The objective of this collaborative farming is to improve the livelihood of the community by farm integration through facilitation of Business Development Services by linking the farmers with the existing farmers’ Institutions or promoting new Institution of farmers. The project envisages on providing quality planting materials of spices backed by customized package of practices for cultivation and Business Development Facilitation linking the farmers with their own institution.

Grameen Sahara has intervened in a limited manner in selected pockets given its limited resource and capability. Markets are normally not nearby. Aggregation of
the produces is also a challenge. Because of all these issues, their income is very low and whenever there is any adverse impact of weather they end up producing less and corresponding earning less. Lands are available but a major portion remains unutilized due to the lack of awareness towards the improved agricultural practices.

Currently Grameen Sahara has been working with nearly 5000 farmers of Kamrup, Kamrup (M) and Goalpara districts of Assam and Ri-Bhoi district of Meghalaya and they are engaged in the production of spices- Black Pepper, Turmeric, Ginger and King Chili in 95 nos. of tribal villages.

Other Key activities carried out under this intervention:
Promotion Nursery unit: 5 Central Nurseries have been setup through 5 progressive farmers (women) to make the availability of quality planting materials locally. It was one of the biggest challenges for the community of the project area to have healthy and improved planting materials in right time in right value before the intervention. The nursery entrepreneurs, after getting proper training on various aspects on management of nurseries have started the production and development of various seedlings and saplings as per need of the project, so that the farmers can easily access the planting materials in right time and as per expectation the farmers take it as a reliable centre of planting materials. The locations and the entrepreneurs were selected by the target community themselves so that a strong bond between the entrepreneurs and farmers could be developed. The nurseries has become an income generating enterprise for the entrepreneur and on the other hand it could be a reliable source of quality planting materials and also a filed level learning centre for the farmers. Thus the nurseries would help the entrepreneurs to earn their livelihood by selling the healthy seedlings, saplings and cuttings to the farmers and at the same time they would minimize the gaps between demand for quality planting materials and supply.
Promotion of Vermi compost Production unit: Grameen Sahara is very much aware about the conservation of soil health. As a part of this initiative the organization is continuously working with the farmers, so that they can understand it properly. To give them practical experience 100 nos. of vermi compost production units have been established in the project villages by the farmers. The farmers have started to use this compost in their crops. To replicate it to the fields of other farmers various steps have been being taken under this intervention, so that the number of such units can be maximized and the area can be made totally chemical free.

Construction of Diversion Based Irrigation- a system towards Natural Resource Management:
To increase the involvement of local people in the preservation of environmental assets and to encourage the community in different farming activities, Grameen Sahara included Diversion Based Irrigation under this Project as one of the major components.
This component is designed to address two main issues namely – i) preservation of environmental assets - the revival and development of the springs and recharging of underground aquifers and sustainable rural economy through development and sustainable extraction of their benefit, in a comprehensive and holistic manner. The endeavor ends at proactive people’s participation through productive activities generating rural employment and agricultural productivity which ultimately leads to food security and all round improvement of rural livelihood and ii) the emerging threats of depleting fresh water resources, depleting ground water resources and global climate change which are aimed to be addressed through implementation of Diversion Based Irrigation System.

This intervention is carried out with its prime aim for preservation of the springs located in the villages by recharging the aquifers through the proper treatment of catchment area with the total participation of the local people through improving their skill and awareness and strengthens their institutions so that the initiatives sustain in the long run. The project level interventions are also demonstrated the possibility of increased income opportunities based on local level resources and efforts. Further, common investments will build capacities for enhanced productivity in agriculture and allied activities.

Under this Azim Premji Foundation supported intervention Grameen Sahara decided to construct 8 numbers of Diversion Based Irrigation System in the remote tribal villages located in the interior hills areas. This is a gravity fed Pipe Based Irrigation System to provide irrigation facility in 8 for adoption of various agricultural activities in homesteads by utilizing the water of this facility.

For proper maintenance and management of the whole system Water Users Groups (WUGs) are also promoted in every project village. They collect regular contribution from the users to build a common fund so, that this money can be used in any further maintenance/repairing of the system whenever required.

The farmers also contributed a part of the construction cost by means of labor for different activities like digging trenches, transportation of construction materials, laying PVC pipes, clearing jungles, catchment area treatment etc and the villagers are trained on a few technical aspects of the whole DBI system.

Grameen Sahara is optimistic that this innovative project would be the torch-bearer in the participatory irrigation management scenario of Assam.

Rural Access to Clean Energy (RACE)

HACI (Help A Child) is an implementing agency based in Chennai. Rural access to clean energy is an initiative of ICCo (Innovative Change Collaborative). This project is basically for safeguarding the environment. It reduces indoor air pollution which in turn will help child health, which again leads to lower child mortality. The project aims to reduce the dependency on the conventional energy and shifting to alternative energy like solar energy. The project provided 1000 smokeless Chua, solar lanterns in two Tea Estate of Nalini and Hatimara under Tinsukia of Assam. Later the same was extended by HACI to 2000 more families. This is for the first time that Grameen Sahara worked with tea tribe, one of the most backward and poor tribes in the state. The project came into end and we exited.

Supporting Human Capital Development in Meghalaya

This is primarily skill project but many other add on. Meghalaya is a small state with a population of 3,276,323 as per latest provisional data. In all 11 districts (now the number of districts has increased) we implemented the project with a team of 27 people primarily from handloom and textile background. We covered 1500 weaver under this project. The weavers were trained on modern weaving technology, design, natural dye, credit and market linkage. It was not like other skill projects – that post training the trained and skilled youths to be provided employment in the corporate or in the government. This project was exclusively on self-employment. Once they are trained, they either went back to their weaving activity with upgradation of looms or they set up new advanced looms to take up weaving as a fulltime activity. One of the major project aims was to provide a monthly income of Rs.4000/-. The range of income per month was between 2000 and 5000. After project completion we had to continue our monitoring and supervision for another year. We have done that to the satisfaction of the Meghalaya State Skill Development Society. Asian Development Bank supported Meghalaya State Skill Development Society (MSSDS), and in turn MSSDS engaged Grameen Sahara to implement the project in two years’ time.

Community-Based Forest Management and Livelihoods Improvement in Meghalaya

Meghalaya Basin Development Agency (MBDA) has been supported by JICA (Japan International Cooperation Agency (JICA) for this project. The core objective of the project is to restore and conserve natural resources within the villages by sustainable forest management, livelihood improvement, and institutional strengthening, thereby contributing to conservation of environment, biodiversity, and uplifting of socio-economic conditions of people in the State of Meghalaya. To fulfill the objectives of the project, need-based activities will be adopted as per village-specific requirements in order to address the diverse needs since it differs.

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
from one village to another. Therefore, a participatory approach will be utilized throughout the life of the project starting from planning, implementing, and operating to maintenance by sensitizing and engaging people. Subsequent to the constitution of Village Project Implementation Committee (VPIC) as a sub-committee of Village Employment Council (VEC) by the Block Project Management Unit (BPMU), the BPMU will conduct sensitization workshops to ensure that all the stakeholders including minor groups such as women and youths. Once VPIC is formulated in a village, NGOs and BPMU will facilitate VPIC to develop participatory land use plan, extend help in further Community mobilization and Gender Sensitization, conducting Gender-sensitization Workshop/Gender Training, Participatory Rural Appraisal (PRA), Micro planning and other Entry Point activities.

The objectives of engagement of NGOs are briefly mentioned herein below:

1. Facilitation of Participatory Land Use Planning (PLUP) at Communities level,
2. Community mobilization workshop, facilitation in prioritizing Entry point activities,
3. Gender sensitization and Gender training,
4. Training workshops on making a Micro Plan,
5. Conducting Participatory Rural Appraisal (PRA),
6. Conduct meeting to select SHGs, and

The project envisages the following desired outputs within the span of two years:

Output 1: Participatory Land Use Planning.
Output 2: Community mobilization and gender sensitization in all selected village/village cluster through workshops and training.
Output 3: Prioritized Entry Point Activities (EPA) for villages (cluster).
Output 4: Participatory Rural Appraisal (PRA) and Micro planning.
Output 5: Microcredit and Income generating activities through Self-Help Groups (SHGs).
Output 6: Any other as may be decided during actual implementation.

In the Inception Phase, the NGO will initiate with Entry Point Activities, thus forming the Village Project Implementation Committee (VPIC) as a sub-committee of Village Employment Council (VEC) by the Block Project Management Unit (BPMU), further strengthening the coordination with VEC and advisory services to the VPIC, guiding the sub-committee to put its efforts in achieving the goals of the project. Mobilization and sensitization activities, meetings and workshops will be carried out during this phase in addition to Gender-sensitization Workshop/Gender Training to the project staff.
Implementation Phase will witness a series of activities like Workshops and Trainings. The workshops and trainings will be further followed by Micro Planning activities, Participatory Land Use Planning (PLUP) and forming and promoting SHG activities. The Project kicked off from February 2022, and the Entry level activities are being carried out.

**APART PROJECT**

(Assam Agribusiness and Rural Transformation Project)

Establishment of Common Service Centers (CSCs) through formation of Farmer Producer Organizations/Companies (FPOs/FPCs)

Granted under World Bank assisted project APART (Assam Agribusiness and Rural Transformation Project)

Implementing Agency: PwC with Co-Partner: Grameen Sahara

Date of Initiation: February 2021

Project Period: 36 Months

**Area Covered: 6 Districts in Assam**

**Background**

Aiming to bring the socio-economic prosperity and sustainably integrating rural producers' households to higher level of income opportunities, the Government of Assam has taken up the Assam Agribusiness and Rural Transformation Project (APART). The project envisages to adopt cluster-based approach within the assigned six districts (as on April 2016) of zone III, to promote better economies of scale, developing marketing linkages and channelize public support services. To achieve the objective of value addition and strengthening of agro-enterprises, the project further aims at commercialization of agriculture sector through aggregating farmers and beneficiaries into Farmer Producer Companies (FPCs) and facilitating FPCs for setting up of Common Services Centers (CSCs). The enterprise promotion component would aim to promote individual and group enterprises by building an effective market and institutional linkages.

To achieve above mentioned objectives, APART hired three consulting organization catering to one zone each. The entire undivided 16 districts of the state have been clubbed under 3 zones. These consulting organizations have been entrusted to support APART team in formation, capacity building and handholding of community institutions especially and establishment of Common Service Centers (CSCs) to be owned by above community institutions FPCs.

APART has appointed PricewaterhouseCoopers Pvt. Ltd. (PwC) led consortia for providing advisory services for establishment of CSCs and promotion of FPCs in Zone 3 districts across four sectors namely Agriculture & Horticulture, Fisheries, Piggery and Handloom & Textiles (Eri and Muga silk). There are six undivided districts identified under this zone namely Nagaon, Morigaon, Kamrup, Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124.
Goalpara, Dhubri & Kokrajhar. As part of the project, we will be promoting 42 FPOs which includes formation of 32 new FPCs and strengthening of 10 existing FPCs.

The key objectives of this assignment are captured below:

- Promotion and strengthening of 42 FPCs
- To undertake various activities such as bulk purchase of inputs and delivery to individual members; marketing of produce, grading and quality control and first level processing and linkages with the market.
- Develop business plans for these producer organizations/companies for those commercially viable activities identified by community
- Assist producer organizations/companies to develop and strengthen the linkages for (a) knowledge and information (b) banks & other commercial lending institutions (c) insurance companies (d) logistics service providers etc.
- Building a database of resource persons and resource institutions for the Producer organizations, networking them and making these persons and institutions available as and when required
- Mentoring, backstopping, and monitoring effectiveness of the producer organizations on regular basis and revising & adapting planning and implementation arrangements to respond to the emerging needs and demands on the ground.
- Supporting the producer organizations to evolve and become pro-market sensitive business entities so that the organizations can make their own rational business plans after the completion of the assignment.

**Deliverables**
- Promotion of 32 New Farmer Producer Companies
- Setting up of 32 Common Service Centers
- Training & Capacity Building Support
- Supporting & Strengthening 10 Existing FPCs
- Providing Critical Management & Handholding Support for Long Term Sustainability
- Development of Business Plans & implementation support

**Approach**

- **Component 1:** Form & Develop
- **Component 2:** Training & Capacity Building of Stakeholders
- **Component 3:** Registration of FPOs & Capacity Building of BODs
- **Component 4:** Preparation of Business Plans
- **Component 5:** Handholding Support for Business Plan Implementation
- **Component 6:** Incubation/Handholding Services for Sustainability

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
We have been working with DASRA for last two years. Through RCRC forum we received grant support for Covid relief and awareness program during 2020-21 which continued for one year. DASRA US is an organization aimed to bolster Indian non-profit organizations (NPOs) and transform the sector by strengthening their effectiveness while significantly increasing the number of beneficiaries. DASRA helps create efficient, scalable and sustainable organizations that ensure a superior social return. The twin main objective of the assignment included distribution of a Preventive Kit which will contain a cotton fabric masks and N95 masks, sanitizer and a piece of soap; creating awareness among the masses and livelihood support through seed’s Distribution and piglet’s Distribution. Our target beneficiaries included school and college students; PHC’s/CHC’s and women SHG Groups. However, while carrying on the assignment we faced certain challenges on ground, some of which included finding new remote areas for vaccination under Chhaygaon and Palashbari Circle, limited numbers of beneficiaries for Livelihood activity, the risk of mortality in case of piglet distribution and limited land availability for plantation of variety of seeds. Under the assignment we ran 35 numbers of general awareness campaigns through announcement in remote villages regarding the benefit of early detection of disease and the information regarding availability of vaccination camps. We also undertook distribution of Preventive Kit at various PHC’s and CHC’s in Chhaygaon and Palashbari Revenue Circles and also organized vaccination camp in some areas. In regard to livelihood intervention, we have distributed piglets and seeds to our identified beneficiaries.

The output of the assignment in terms of Target vs Achievement can be highlighted in the following tabular form:

**CRISIL Project**

We have completed two years of implementation of the CRISIL project 2019-20 and 2020-21. We started with 200 sericulture families. A total of 90 producer groups were formed. The income enhancement target was Rs.70,000 per annum per family. It was a very high target. And it was difficult to achieve this target in two years of time exclusively from sericulture. That is why we included other crops could give additional income such as horticulture crops. We are pleased to report that the income increased up to Rs.1,06,000/ which is a record income enhancement in two years’ horizon. The project beneficiaries also have been linked to Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124.
SELCO Foundation and ASRLM. The other good thing is that the production of the beneficiaries has been linked to the market including Grameen silk Producer Company which also have come up post implementation of Golden Weavers' Project supported by Tata Trust. We are also expecting support from CRISIL foundation for next one year, i.e., 2022-2023. Already discussion have progressed.

**Project Supported by SIDBI for micro-entrepreneurship development**

Introduction: Livelihood Outreach Programme - Swavalamban Hunarbaaz focuses on empowering the rural women of Matia Block of Goalpara district of Assam. This project mainly focuses on creating strong digital literacy awareness as well as financial literacy among the artisans. And also facilitate in capacity building of the artisans towards on-boarding into E-commerce platforms like Amazon, Flipkart and other web portals from where they could sale their products to other institutional buyers or individuals. Aim of the Project: The project aims to empower the rural women with - • Digital and Financial literacy • Handholding for on-boarding over e-marketing platforms • Identification of role models for mentoring and formation of associations Project Objectives: • To create digital literacy among Artisans • To build the capacity and handhold Artisans for on-boarding / sale of their products to organizations / end users directly on digital platform • To improve the sales and social standing of Artisans in the community.

• Aim is create a globally recognized sustainable demand for Indian artisan goods at profitable Look ahead for the next Quarter: → To organize awareness campaign for creating awareness, → Implementation of digital literacy and financial literacy programs with the help of ASRLM → Facilitate in capacity building of the artisans towards on-boarding into E-commerce platforms (GeM & Private platforms) → Formation of institutional entity i.e. registered partnership / LLP / Pvt. Ltd. / Natural Producer Company / Co-operative Society etc. → Entrepreneurship development program for encouragement of beneficiary to implement their skills in a productive manner for sustainable livelihood. → Continuous tracking of ongoing activities within beneficiaries.
Grameen Sahara has mobilized grant support from different philanthropic organizations, development agencies, CSR from corporate and government departments and agencies. These funds have been utilized with in achieving the very objectives of Grameen Sahara and its purpose of existence. While India has been a welfare state and presumably NGOs should not have any role to play, the reality has been different as the country’s progress has not been uniform and a major chunk has remained outside the mainstream economy. They have remained backward economically and they needed support to get them improved economically. The government has also remained supportive to the good works of the NGOs and we also could continue our endeavour to help the families escaping from their poverty situation. We could mobilize nearly Rs.30.00 Cr in last 15 years, i.e. Rs.2.00 Cr every year on an average.
Governance of Grameen Sahara

The governing board of Grameen Sahara consists of eminent persons from diverse fields and domains. And the operational authority is vested on the Governing Board, that meets at least four times in a year. It reviews the progress, resolves that future plans and guides the executive director for operational management. Current board has 5 members including the executive director. They are from different fields—agriculture, fishery, veterinary, education, business, management, social work, etc. The Secretary bridge between the board and management. The board is highly professional and guides the management through the Secretary. The board frames various policies of the organization, approves the strategies, and ensures the compliance through the Secretary and the executive director.
Dr. Chandra Prabha Bhuyan

Dr. Bhuyan retired from Sipajhar College as Principal. Due to her urge to work for women and community she joined Assam Mahila Samata Society (AMSS) as its director. She left AMSS and continued her service to humanity. Dr. Bhuyan also worked with Sarba Siksha Abhijan. She has been with Grameen Sahara for last three years. Currently she is very closely associated with Theosophical Society and works in spreading theosophical ideas among the people.

HUMAN RESOURCES

Grameen Sahara with its composite team has been successfully and skilfully executing its program activities around various sectors and in various geographies, this has been possible only because of the contentment of the employees which has been made possible by the prevailing positive and productive work culture. The organization has a skilful and a competent team of professionals from various backgrounds. They are having academic background from Science, Commerce, Economics, Sociology, Management, Agronomy, Pisciculture, Handloom & Textile, Engineering, Law Animal husbandry and so on bring reach experience which gets visualised in the successful implementation of the program.

The organization have been able to give a right platform to its employees to explore their potentialities while working with the community in vivid sectors. This might be the reason for low attrition rate of employees in Grameen Sahara. The organization focuses on the training and mentoring of the staff and creating leaders for the second line management, developing leadership capacities have been given importance. This has at different levels of organisations been the result of the Vision of the Founding Father of the institution that the guiding principles have been infused in mind of everyone, which will continue to remain same. The organization maintains strong HR compliances and policies for the greater benefit of the employees and institution as a whole. Since, the HR purpose is all about managing people and talents here technology plays and important role that will increase efficiency and improve employee involvement. Grameen Sahara has always been open to new innovation and technologies and we are looking forward to induce whatever helpful technological solution with our limited resources such as HRMS even in small capacity.
Grameen Sahara is proud to share that VikasAnvesh Foundation, a Tata Trust Associate Organization, has profiled our founder & Secretary Sri Sarat Chandra Das as one of the outstanding Social Entrepreneurs of India and has published his profile and the works of Grameen Sahara in a book named ‘GEMS OF PUREST RAY SERENE-GLIMPS INTO LIVES AND WORKS OF INDIA’S OUTSTANDING SOCIAL WORKERS’
Partnership and association

Grameen Sahara, Dubjeni, Kulsi Road, Chhaygaon, Kamrup, Assam-781124
Grameen Sahara will continue to focus on sustainable livelihood; however, since climate change has become the most challenging global issue, we will also work on climate issues.

It has, of course, a very close relationship with the people's livelihoods, especially the people living in the less developed and developing countries. Climate change is going to impact food production, health, water, plants, and animal lives and so on.

Therefore, as an organization working on sustainability will work on climate change. Focus of Grameen Sahara will remain on women, farmers, artisans, youths and children. Whatever initiative we take will all have bearing on the above groups. While working for these groups, Grameen Sahara will be resilient on environmental issues.

Any activities that have a negative impact on environment will never be taken up by the organization. Although philanthropic fund mobilization will continue given the legal consideration, the organization will also strengthen its social enterprise building works so that there could be internal or local revenue.
